-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on ____.
- 2a) This action is **FINAL**. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) Claim(s) 1-16 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) Claim(s) ____ is/are allowed.
- 6) Claim(s) 1-16 is/are rejected.
- 7) Claim(s) ____ is/are objected to.
- 8) Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on ____ is/are: a) accepted or b) objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) All b) Some * c) None of:
 1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. ____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) Notice of References Cited (PTO-892)
- 2) Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) Information Disclosure Statement(s) (PTO/SB/08)
 Paper No(s)/Mail Date 26 March 2004.
- 4) Interview Summary (PTO-413)
 Paper No(s)/Mail Date. ____.
- 5) Notice of Informal Patent Application
- 6) Other: ____.

Claim Objections

Claim 5 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 5 is identical to claim 4 from which it depends.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Naitoh et al (6,063,741) in combination with either Iwashita et al (6,139,022) or Iwashita et al (6,325,385).

Naitoh et al [“Naitoh”] disclose an internal combustion engine oil composition comprising (1) at least one oil selected from mineral oil and synthetic oil; (2) a molybdenum dithiocarbamate in an amount of about 50 to 2000 ppm by weight when calculated as molybdenum (Mo), relative to the total weight of the engine oil composition; (3) zinc dithiophosphate in an amount of 0.01 to 0.2 weight % when calculated as phosphorus, relative to the total amount of the engine oil composition; and (4) an ashless organic polysulfide compound in an amount of 0.01 to 0.4 weight % when calculated as sulfur, relative to the total amount of the engine oil composition. See column 2, lines 15-60. Applicant’s invention differs by

applying the engine lubricating oil composition to an internal combustion engine having one or more component parts coated with a diamond-like carbon film or coating. However, such is well-known in the art as set forth in the Iwashita et al [“Iwashita”] references.

The Iwashita references disclose a piston ring for use in internal combustion engines having a gas nitrided layer and a hard film with a thickness of 0.5 to 10 micrometers on the gas nitrided layer at the outer circumferential surface. The hard-film comprises a diamond-like carbon in which are dispersed carbides of one or more elements. The Iwashita references teach that engines in recent years must meet increased demands for higher output, higher revolutions per minute, longer product service life, and must also comply with stricter exhaust gas emission regulations. As a consequence, the piston rings must operate in harsher operating environments and the diamond-like carbon coating provides the piston ring with increased resistance to scuffing and wear. Thus having the prior art references before the inventor at the time the invention was made it would have been obvious to have lubricated an internal combustion engine containing pistons coated with a diamond-like carbon film with the lubricating oil composition of Naitoh. The examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, the motivation relied on by the examiner is the disclosure in the applied

references to provide internal combustion engines with increased demands of lower friction losses and improved exhaust emission outputs.

Claim Rejections - 35 USC § 103

Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Walker et al (6,444,624) in combination with Nakahigashi et al (6,893,720).

Walker et al [“Walker”] disclose multigrade lubricating oil compositions suitable for the crankcase of internal combustion engines which comprise a basestock containing from 0 to less than 10% of Group I and/or Group II basestocks, a molybdenum additive including molybdenum dithiocarbamates and trinuclear molybdenum compounds that provide not greater than 1000 ppm of molybdenum to the lubricating oil composition, a calcium detergent, a viscosity modifier and one or more other additives. See column 3, line 29 to column 4. Applicant’s invention differs by applying the engine lubricating oil composition to an internal combustion engine having one or more component parts coated with a diamond-like carbon film or coating. However, such is well-known in the art as set forth in Nakahigashi et al [“Nakahigashi”]

Nakahigashi discloses an object such as an automobile part, an image forming apparatus part, a bicycle part or other machine parts having a surface entirely or partially coated with a carbon film, typically a diamond-like carbon film, having wear resistance as well as at least one of a lubricity, a water repellency and a gas barrier property. Automobile parts disclosed in Nakahigashi include dampers, hoses, tires as well as automobile valve parts, gears, bearings, and other parts. See columns 3-4. Thus having the prior art references before the inventor at the

time the invention was made it would have been obvious to have lubricated an internal combustion engine containing automotive parts coated with a diamond-like carbon film with the lubricating oil composition of Walker. The examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, the motivation relied on by the examiner is the disclosure in the applied references to provide internal combustion engines with increased demands of lower friction losses and improved exhaust emission outputs.

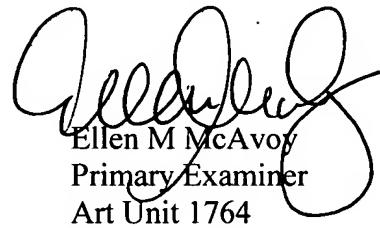

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ellen M. McAvoy whose telephone number is (571) 272-1451. The examiner can normally be reached on M-F (7:30-5:00) with alt. Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Calderola can be reached on (571) 272-1444. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
